

Print and Copy Tracking for AEC Firms

Thomas Printworks provides the most comprehensive print and copy tracking solution built for the AEC industry, capable of integrating with existing accounting systems, resulting in accurate and on-time billing for every project.

Compatible across large format, MFP, and color production printers, our tracking solution makes a variety of AEC print environments profitable.

Specifically Designed for AEC

Thomas Printworks ensures that printing workflows aren't interrupted. AEC printing is complex and can include batching, RIP servers, and custom processes in CAD/BIM software. Our tracking software stays out of the user's way while accurately collecting print data.

For Firms of Any Size

We work with some of the world's largest AEC companies, as well as hundreds of small to mid-sized firms. From global organizations with hundreds of printers, to small companies with no in-house IT, our tracking solution is a great fit for all of them.

Automated Accounting

We offer seamless integration with industry and enterprise ERPs like Deltek, BST, and Oracle. This keeps project lists up to date and monthly billing a snap.

Print Tracking

Stays out of the user's way while collecting as-printed data straight from the printer.

Print Release

Users are presented with a single print queue. Printing is easy and documents stay secure.

Copy Tracking

No more tedious billing at the copier panel. Users can bill copy costs at the computer.

ERP Integration

Powerful automation keeps billing data accurate and accounting teams happy.
